

Independent Learning Timetable 2020-2021

Research shows that Independent Learning outside of lesson time significantly improves the academic success of pupils ([source- Education Endowment Fund](#)). In order to ensure that our pupils gain from this success we provide Independent Learning on a regular basis. The learning will consist of a variety of tasks including online learning, reading, projects and revision. Independent Learning is set electronically and is available to view through the calendar on itslearning. Parents are encouraged to refer to the [IL toolkit](#) to see how they can support their children to be most successful with Independent Learning.

Pupils in Year 7 and 8 should complete 45 minutes per subject a week, approximately 9 hours in total. In Y9-11 this should increase to an hour per subject a week, approximately 9 hours in total. If there are times when the tasks are shorter we would encourage you to support your children to spend that time reading fiction or non-fiction books, newspapers or magazines.

To support Independent Learning we would encourage parents to ensure their child has a quiet place to study in the home or makes regular use of the library after school.

In the first half term Year 7 will be on a rota with different subjects setting IL at different points. This is to support pupils to build up to a full IL timetable during the second half term and beyond.
